

two_partitions_find
_best_combination_for
_every_quantization_and
_integer_count

```
graph LR; A["two_partitions_find  
_best_combination_for  
_every_quantization_and  
_integer_count"] --> B["astc::max"]; A --> C["astc::min"];
```

The diagram illustrates a function call. A gray rectangular box on the left contains the text 'two_partitions_find', '_best_combination_for', '_every_quantization_and', and '_integer_count' stacked vertically. Two blue arrows originate from the right side of this gray box. The top arrow points to a white rectangular box containing the text 'astc::max'. The bottom arrow points to another white rectangular box containing the text 'astc::min'.

astc::max

astc::min
