copy_scanline

```
graph LR; A[load_dds_uncompressed_image] --> C[copy_scanline]; B[load_ktx_uncompressed_image] --> C;
```

The diagram illustrates a data flow where two separate loading functions, 'load_dds_uncompressed_image' and 'load_ktx_uncompressed_image', both feed into a single 'copy_scanline' function. The input boxes are white with black borders, while the output box is gray with a black border. Blue arrows indicate the direction of the data flow from left to right.
