determine_image_components

```
graph LR; A[store_dds_uncompressed_image] --> C[determine_image_components]; B[store_ktx_uncompressed_image] --> C;
```

The diagram illustrates a flow where two separate inputs, 'store_dds_uncompressed_image' and 'store_ktx_uncompressed_image', are processed together by a function named 'determine_image_components'. The input boxes are white with black borders, while the output box is gray with a black border. Blue arrows indicate the direction of the flow from left to right.
